In Memoriam.

DECEASE OF JAMES S. BRYANT, LATE OF HARTFORD, CONN.

WE learn, by a letter from Mr. Frank D. Andrews, that the well known and highly respected numismatist, James S. Bryant, died on the 20th of last December. Mr. Bryant had been connected with the commission house, now known as Root & Childs, for a period of thirty-five years. His great-grandfather was sent out by Gen. Washington to find a site for an armory. He selected Springfield, Mass., then a village, and there he remained; his son, the grandfather of James S., subsequently became the official who took charge of the armory. Mr. Bryant had been a coin collector "all his life," as he often said, and had gathered together a cabinet of exceedingly fine and choice American coins. His set of United-States cents is exceptionally fine, — four of each year, embracing the more important varieties, and selected in the early days of coin collecting. His collection of the United-States Mint issues of silver coins lacks but few pieces of being complete; viz., the 1794 and 1804 dollar, and the 1802 half dime, and a few others only needed to complete the entire series of the United-States coinages.

Of proof-sets he has all from and including 1858 to the present year; also, a large collection of medals, and some choice colonial coins. Mr. Bryant exhibited his treasures freely, and the young collectors of Hartford found him willing to give them advice and aid, and are indebted to him in many ways. His judgment regarding coins was never questioned. His honesty and integrity in business matters were of the highest quality. Mr. Bryant lost his wife, to whom he was much attached, about two years ago; and since then his interest in this life has grown less, his health having been failing. He died at the age of sixty-four. He leaves two sons, both in business in Hartford. Those who knew him and his rare qualities will mourn his loss. He had been connected with the Unitarian Society, and one of its officers for many years.

Mr. Frank D. Andrews writes the following additional testimony to the character of the late Mr. Bryant: —

VINELAND, N.J., Jan. 17, 1885.

MASON & Co.

Gentlemen, — In addition to the items I send you concerning the death of J. S. Bryant, I would add my tribute to the memory of our departed numismatic brother, having enjoyed his friendship and confidence for several years, being a frequent visitor to his pleasant home before the death of his wife, some two years ago. Since that time he seemed to lose his hold upon life and the interests which once held him. I could sympathize with him, as I had met with a similar loss a short time before. I will say here, that, for the want of something to closely occupy and engage the mind, I attempted the work upon the United-States cents 1816–57, which you kindly praise

in the last number of your MAGAZINE. There is nothing, as you may well know (as I judge you have had a like experience), to enable one to endure sorrow as constant occupation, which shall keep the mind from dwelling upon its loss.

FRANK D. ANDREWS.

PROFESSOR WILLIAM WAGNER.

DEATH OF THE FOUNDER OF THE WAGNER FREE INSTITUTE OF SCIENCE.

PROFESSOR WILLIAM WAGNER, the founder of the Wagner Free Institute of Science, died Jan. 17, at his residence on Seventeenth Street, above Montgomery Avenue, Philadelphia, from general debility occasioned by old age. The deceased was ninety years of age, and was born in Philadelphia, on Eighth Street, near Filbert. He evinced a taste for the study of medicine and surgery under the celebrated Dr. Physick; but the deceased's father objected, and turned him aside to mercantile pursuits, apprenticing him to Stephen Girard, in whose employ he remained for over seven years, part of which time he was confidential book-keeper. He was sent abroad several times by Mr. Girard as supercargo, visiting many ports, and making large collections of minerals, plants, shells, coins, and other valuable specimens. After leaving the service of Mr. Girard, he engaged in business as a shipping merchant, retiring about forty-five years ago.

Professor Wagner was a collector of Indian stone relics and coins, and known to numismatists throughout the world. We cannot soon forget the many pleasant interviews we have had with the professor; his amiable manners and strict integrity made him hosts of friends. The greater portion of his coin collection and gems were stolen from the Institute several years ago, and the robbery was published in MASON'S COIN COLLECTORS' MAGAZINE. We unite with his relatives and friends in mourning this great loss to the community where he was so well known and respected, and the greater loss to the sciences in which he was engaged.

HONORS TO AN EMINENT NUMISMATIST AND MASON.

THE Masonic fraternity of this country recently crowned Robert Morris, LL.D., poet laureate of the order, with appropriate ceremonies. On being crowned, Mr. Morris wrote the following letter:—

[Residence at La Grange, Ky.]

NEW YORK, Dec. 18, 1884.

R. W. GEORGE W. MORGAN, *Grand Organist*.

My Very Dear Brother,—When the little remnant of my earthly career has lapsed, and my name is a shadow, it may be agreeable to you to see over my signature this

TESTIMONIAL OF GRATITUDE

for your very large aid in making the demonstration of last evening a positive success.

The laureation is a compliment so far beyond any thing that precedes it that it promises to gild the evening of my days with a halo I could never otherwise have realized.

Your obedient brother,

ROBERT MORRIS, *Poet Laureate*.

The following is Mr. Morgan's reply:—

Dec. 24, 1884.

R. W. ROBERT MORRIS, LL.D., *Poet Laureate*.

My Dear Worshipful Brother,—It did, indeed, give me great pleasure to receive your kind and thoughtful letter. I congratulate you on receiving the appointment which, in the eyes

of the Masonic fraternity, you were so justly entitled to, and trust your life will long be spared to fill the position of poet laureate, and be crowned not only with laurels, but with health, happiness, and prosperity, is the sincere wish of

Your faithful brother,

— *Boston Globe.*

GEORGE W. MORGAN.

[We feel particularly proud of our contributor, friend, numismatic and Masonic brother, Robert Morris, LL.D., and glad to hear of the deserving honors being showered upon him. For years Brother Morris has, by his pen and personal exertions in both hemispheres, contributed largely to improve the Masonic brotherhood; and, as a numismatist, his efforts have been unremittingly exerted to give the world a better knowledge of the world's coinages. — *Ed.*]

AN ILLUSTRATED HISTORY OF THE MINTS OF THE UNITED STATES AND EUROPE.

BY E. LOCKE MASON.

PART I.

THE UNITED-STATES MINTS AT PHILADELPHIA, PENN., CHARLOTTE, N.C., DAHLONEGA, GA., NEW ORLEANS, LA., CARSON CITY, NEV., AND SAN FRANCISCO, CAL.

THE ORIGINAL UNITED-STATES MINT, ERECTED AT THE NORTH-EAST CORNER OF SEVENTH AND JAYNE STREETS, JULY 31, 1792.

This mint, a history of which was published in the June number of the COIN COLLECTORS' MAGAZINE, 1884, is still standing, and occupied by various parties for business purposes. Its general appearance has not been changed by time, excepting in looking

rather the worse for wear. Gen. Washington, while President, frequently visited this mint, and witnessed the coinage of the cents and half cents of 1793, and the silver and copper issues of 1794. It is recorded that Washington resorted to this mint for the private coinage of the 1792 silver dimes and half dimes, which were coined from a portion of his old silver plate, and presented by him to friends of the family.

THE "MASTER-MINT" OF THE UNITED STATES.

THIS beautiful marble building was erected in the year 1830, Congress having approved the Act for the removal of the old mint to its present site May 19, 1828. It is located on the north side of Chestnut Street, west of Broad Street. For full history of this mint, see June number of the MAGAZINE.

THE CHARLOTTE, N.C., MINT.

The original Charlotte Mint was erected in 1836, and was established for the coinage of gold only. The United-States government commenced the coinage in the first mint in 1838, and continued operations until 1844, when it was destroyed by fire. The mint, as above illustrated, was erected in 1845, and continued to coin gold pieces until 1862, when, by Act of Congress, it was transformed from a regular mint to an assay office.

[To be Continued.]

ANCIENT CHINESE COINAGES.

NO. 1.

TAO COINAGE, 2435 B.C.

THE emperor of China, *Wang-Mang*, ordered some knives marked "Ts'o-TAO," and had the inscription on the knife washed with gold. The accompanying illustration exhibits the exact length and width of this peculiar coin, the material being a composition resembling bell-metal. The interpretation of "Ts'o-TAO" is, in English, "Gilded Knives," or "Precious Merchandise," and "Little Money." The arbitrary value was five hundred "cash," or eighty cents.

[To be Continued.]

CURRENT THOUGHTS ON COINS AND COINAGE.

BY ROBERT MORRIS, LL.D., OF LA GRANGE, KY.

PART SIX.

FROM my copy-books of numismatic correspondence, I gather a few items which may prove interesting to your readers. I insert them with no special regard to order.

The emblem of the pointless spear, *Hasta Pura*, is seen in the hand of Jupiter and various peaceful deities, the personifications of moral virtues. It was emphatically the wand of divinity. Mars has his javelin, Pallas has her warlike insignia; but Jupiter, as needing no weapon of earthly mould or shape upon your coin, bears only a spear-handle, the pointed head being removed.

The *sistrum* which you find upon the coinage of Alexandria, Egypt, is emphatically an Egyptian emblem. It is, in shape, a horseshoe,—an elongated instrument of brass, fixed upon a handle having loose bars reaching across it from side to side. These made a jingling noise when shaken, as they were in the religious procession by the priests of Isis.

The word *Virtus*, so common upon Roman coins, is best translated "gallantry," "courage," etc. A warrior was described as *Haud ulli veterum in virtute secundus*; that is, "not inferior in courage to any of the ancients."

In regard to the whole subject of alloy in American coins, bear in mind, that, prior to Jan. 18, 1837, the proportion of base metal combined, the gold and silver coinage of our mints was *one-twelfth*; that is, in every one hundred pounds of coins only seven-eighths was valuable, the other eighth being pure copper. Coming back to the early legislation, we find, in the Act of Congress, April 2, 1792, that the money to be minted must be 1,485 fine; that is, 179 parts alloy. The standard, you will see, was 1,664, which I believe was the English standard of the period, and certainly an awkward one for the calculator. By the Act, gold coins were made of eleven parts pure gold and one part alloy, the latter being a mixture of silver and copper not exceeding one-half silver. The same proportion was set for the silver coinage.

But, by the later Act (Jan. 18, 1837), the decimal system was adopted: "The standard for both gold and silver coins of the United States shall hereafter be such that of 1,000 parts by weight, 900 shall be pure metal, and 100 of alloy; and the alloy of silver coins shall be of copper, and the alloy of gold coins shall be copper and silver, provided that the silver does not exceed one-half of the whole alloy."

A NUMISMATIC TRIP TO EUROPE.

BY E. LOCKE MASON.

[Commenced in the June number.]

THE steamer had apparently reached an even keel, and the writer took the opportune moment to exhibit a handful of proof coins to some half dozen passengers gathered around him, when a heavy sea, then approaching the broadside of the vessel, was quietly observed by the said passengers; while the coin dealer, in his ignorance of the fact, had failed to secure himself, as the others had, by holding on to the seats and convenient parts of the rigging, etc. Whish! wash! bang! and the huge wave struck the vessel. The next instant coin dealer, coins, hat, boxes, etc., were promiscuously distributed along by the seuppers; while the dealer, with superhuman efforts, was clinging to the rail, the upper half of his ponderous body well over towards the foaming, heaving sea. Our only recollection at the time was the jubilant "Ha! ha! ha!" that echoes even now in our ears. But a change came over the scene; while some of the unsympathetic, but amused and slightly repentant, passengers were helping to fish out from the salt water the beautiful proof silver coins, and others were aiding in restoring the coin dealer to his equilibrium, another huge wave and another lunge shifted the vessel from another even keel; and "skip! slap! bang!" the stooping passengers were rolled over in the water like so many empty casks, and brought up "all laying" in a heap, with the water over a foot in depth, salting them down. What a pickle! It was now our turn to do the "ha! ha! ha!"-ing, which was done with a will; and, *honors* being equal, we gathered up the coins, all changed clothes, and had a subject for merriment during the balance of the voyage. Rain, strong wind, and heavy seas the balance of the day, and continued all night.

May 7. — Up very early to witness a funeral on the ocean, or rather a burial at sea. A poor sick man, on his way home to Ireland, came on board the steamer at New York, almost a stranger, there being but one passenger on board who knew him. This passenger stated that the man, when he bought his ticket, stated that he was expecting to die ere many days, and took passage with us in the fond hope of reaching home to die among relatives and friends in Ireland. He grew worse day by day, and died last night, almost within sight of his loved native land. The burial was arranged quietly through the night; for it is not customary, on board ship, to keep a corpse any longer than the time necessary to prepare for the burial ceremonies. The ship's carpenter constructed a pine coffin of rough boards, and bored a number of auger-holes through the sides and ends, to allow the water ingress, and hasten the sinking of the body when plunged into the sea. At seven o'clock this Sunday morning, all was in readiness; and a large number of steerage, with a few of the cabin passengers, had gathered upon the deck to witness this strange and, to many of them, unique burial. The coffin, or box, was placed on the shoulders of six stalwart seamen with uncovered heads, who deposited it at the side of the lower deck, aft of midships, on a long plank, which had been run out of an open portion of the vessel. The box was covered by the American flag (the English flag half-masted), and the sailors stood ready to obey signals. The captain read a short chapter, customary upon these occasions, and gave the signal, when the sailors withdrew the flag, tipped up the plank, and the coffin slid off into the ocean,

and shortly sunk from sight; thus finishing the last sad rites to the departed. Thus, with this short ceremony, without previous notice, surrounded by a few only of the passengers, the poor man's burial took place.

Probably in forty-eight hours we could have landed his body in Ireland, as we have but about six hundred and fifty miles to reach Cape Clear, and the Irish coast is near the cape. He died of dropsy. This will be a severe blow to his friends and relatives, who are anxiously awaiting his arrival.

OUR HOBBIES.

AN EARLY AMERICAN PRINT.

WE have a wood-cut, mounted on a wooden panel, representing a group of presidential portraits, in medallions; viz., Washington, Jefferson, and Madison; size of print, $10\frac{1}{2} \times 9$ inches. Printed by Shelton and Kensett, Cheshire, Conn. Designed, engraved, and published by Thomas Gimbrede, Jan. 30, 1812. New York. Good condition, excepting a trifling discoloration. Price \$25.00.

RANDOM OBSERVATIONS.

No. VII.

BY T. W. T.

[Written for "Mason's Illustrated Coin Collectors' Magazine."]

ONCE in corresponding with an owner of a promiscuous lot of oddities, as heterogeneous in variety as the owner was in moods, I found it necessary, in order to save travelling expenses to go on such a problematic errand, to request a description of what appeared to him to be the most peculiar, most prominent, most valuable coins in his possession that he wished to dispose of. I wrote him a sort of running memoranda of what I would be pleased to have a description of, and subsequently to examine if I deemed expedient, without explaining what I mentioned, in a general way, as "trial-pieces, patterns, colonials, mule-pieces, etc."

I soon received a voluminous epistle, enumerating, among others, "a splendid *mule-piece* of rare and peculiar design. He offered to pay half my fare to visit him for trade's and sociability's sake. I went; but I found his *mule-piece* to be an ordinary 1837 bastard token so well known. I explained to him the "mule," as he had called the *donkey*, its significance, and the occasion which produced it. He appeared to be an abashed, though an attentive and interested, listener. Finishing my explanation to the end I considered judicious, he exclaimed, "I thought that d—d jackass was a mule." I bought his odds and ends for a trifle: he abated my full fare, and requested me to "keep mum" about it; and I have kept silent now some twenty-five years.

OUR BARGAIN DEPARTMENT.

THE above heading will be kept standing to represent special bargains picked up in our trips through the country and at our office. Every piece or article is on hand at price named, which is below all dealers' prices, and warranted as represented, or money refunded. Corrected monthly.

Confederate Notes and Bonds; Match, Medicine, Revenue, and Postage Stamps.

RARE CHINESE COINS A SPECIALTY.

Correspondence Solicited.

Every Coin Collector Wants It! Bankers, Brokers, and
Store-Keepers Use It!

HATCH'S POCKET COIN TEST.

A SAFE, CONVENIENT, AND INFALLIBLE DETECTOR OF COUNTERFEIT COIN.

¹ ENGRAVING No. 1 represents the exact size and form: Nos. 2 and 3 show the Test open, and ready for use. It can be carried conveniently in the vest-pocket, and, with reasonable usage, will last a long time.

In using, the coin to be tested is first moistened; then the test, which is inserted like lead in a pencil, as shown in Fig. 3, is rubbed upon it. Its effect upon spurious coin is quick and

effective, as is evidenced by the coin changing color instantly. It has no effect on gold or silver. It is widely recommended by bank officials and bankers as the best and most convenient Test ever offered to the public.

TREASURY OF THE UNITED STATES, Aug. 14, 1881.

GENTLEMEN: Sir, — I have examined your Coin Test, and find that, for detecting spurious coin, it is equal to liquid acid; and that for convenience in carrying, and the ease and quickness with which it can be used, it is superior to any test that has been tried in this office. Very respectfully,

JAS. GILFILLAN, *United States Treasurer.*

DIRECTIONS FOR USING.

Molsten the coin, then apply the test. Spurious coin changes color instantly, but it has no effect on good coin.

Sample by mail, post-paid, 25 cents; 1 dozen, post-paid, \$2.00; 6 dozen, by express, \$9.00; 12 dozen, by express, \$16.00.

MASON & CO., 235 Washington Street, Boston, Mass.
